

# Opportunities at Wood

## Human Environment Specialist

Job Location: **Barrie, ON**

Job Reference Number: **21803**

**Wood** is a global leader in the delivery of project, engineering and technical services to energy and industrial markets. We operate in more than 60 countries, employing around 55,000 people, with revenues of over \$11 billion. We provide performance-driven solutions throughout the asset life-cycle, from concept to decommissioning across a broad range of industrial markets including the upstream, midstream and downstream oil & gas, chemicals, environment and infrastructure, power & process, clean energy, mining and general industrial sectors. We strive to be the best technical services company to work with, work for and invest in. [www.woodplc.com](http://www.woodplc.com)

### Role Overview

Wood Environment & Infrastructure Solutions' Human Environment team provides human environment services across various sectors, examining the interactions between human populations and the physical environment in project-specific context. We are currently seeking a **Human Environment Specialist** to join our team in Barrie, ON.

### Key Responsibilities

- Report directly to job specific task and project managers in provision of Human Environment technical support
- Conduct and coordinate a wide variety of socio-economic investigations in support of baseline studies, impact assessments, effects management and monitoring plans
- Support planning and implementation of Indigenous and public engagement programs for a wide range of projects, including municipal, resource development, remediation and environmental assessment projects
- Prepare and contribute to technical proposals and reports
- Contribute to the growth of our Human Environment services through providing excellent leadership and service to internal and external clients
- Liaise and work effectively with team members, other Wood technical specialists, clients, government agencies, Indigenous communities and stakeholders
- Other duties as assigned from time to time

### Skills / Qualifications

- University degree (graduate level preferred) in Environmental or Social Science, or related field preferred and 5 years relevant experience
- Excellent written, oral and interpersonal communication skills (English; French is an asset)
- Experience in applied social, economic and demographic research and analysis for the natural, cultural, municipal and community economic development sectors
- Background and interest in some combination of renewable and non-renewable resource development, land use planning, public consultation, economic development, waste management, physical infrastructure, social services programming and cultural development
- Knowledge of municipal, provincial and federal environmental assessment processes is an asset
- Experience in stakeholder and Indigenous engagement strategy development, management and implementation
- Strong budgetary, statistical and report presentation skills
- Desire to provide excellent client service and commitment to continuous technical improvement
- Ability to work independently in a strong entrepreneurial environment
- Good organizational skills and the ability to manage and prioritize several assignments at one time, deliver on time and within budget
